

WOODVILLE CONSTRUCTIONS

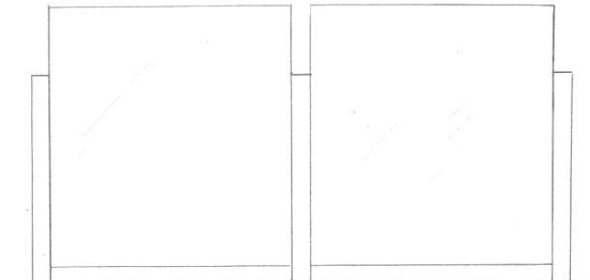

50 Series Glass Semi Frameless Pool Fencing

Woodville Constructions "50 Series" Glass Semi Frameless Pool Fencing utilizes a 50mm (either square or round) post system in a variety of materials and finishes, such as powdercoated extruded aluminium, brushed or polished stainless steel and hot dipped galvanised steel. All pool fencing meets and exceeds current building legislation. Woodville's most popular product is our square post powdercoated aluminium system ideal around salt water pools or marine environments. Combined with clear toughened glass panels & gates in either 8mm or 10mm thickness depending on design criteria, it allows your pool to be the feature without giving a fenced off look.

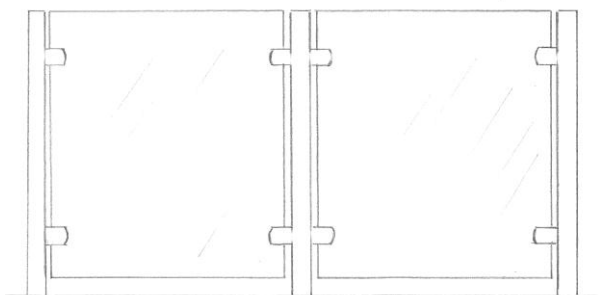

Some Design Options

1 – Full Post Height

2 – $\frac{3}{4}$ Post height

3 – Glass Clamp Fixed
