

WOODVILLE CONSTRUCTIONS

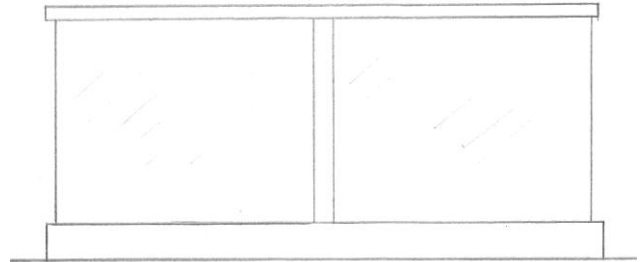

Frameless Glass Balustrading

Woodville Constructions offers a number of options for frameless glass balustrading to suit your required project. All balustrading meets and exceeds current building legislation. Several main options are available utilizing 12mm clear toughened glass (or tinted & thicker glasses depending on your requirements). In being frameless the views are maximised. The handrail required by current building regulations connecting panels together can be kept to a minimum also. Whether on a timber deck, masonry or other structure we have the options available to meet the most discerning requirements.

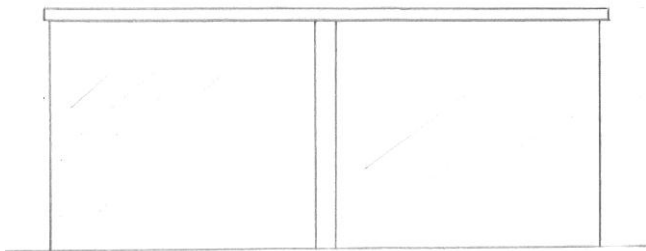

Some Design Options

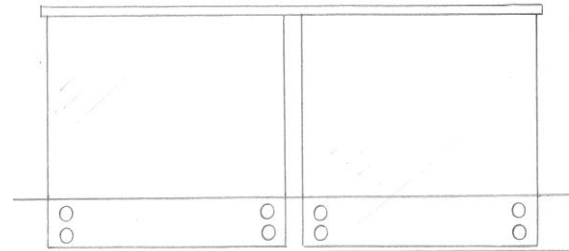

1 – Spigot Mounted (Deck/Paving)

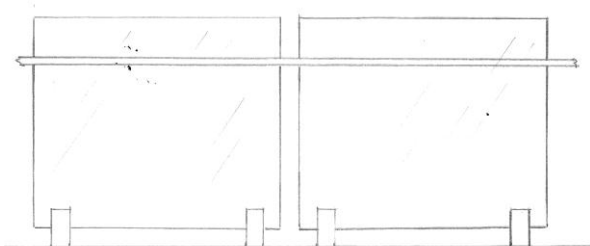

2 – Channel Mounted (Grout or Groutless) Systems

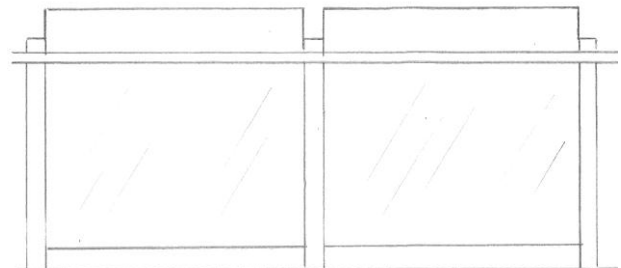

3 – Concealed Channel Mounted (Grout or Groutless) Systems

4 – Stand Off Supported

4 – Spigot Mounted (Deck/Paving) Reduced handrail Height

5 – Reduced Post & Reduced Handrail Height
